

ABSTRACT OF THE DISCLOSURE

A process for producing a high purity trialkanolamine
excelling in hue and having an APHA of not more than 40,
5 characterizing by including producing a mixed alkanolamine
by the reaction of an alkylene oxide with ammonia; removing
low-boiling substances from the mixed alkanolamine; removing
high-boiling substances by subjecting the product deprived
of the low-boiling substance to vacuum distillation, and
10 redistilling the distillate obtained by the vacuum
distillation.
